I travel into chicago,il 3 to 5 times aweek in a semi truck i have found that xm 217 for chicago has kept me out of alot of traffic jams,cause with there 24/7 info i'm able to take other routes to advoid the backups,the local station wbbm/wgn duze cover every 10 min but sometime don't cover all routes plus chicago traffic changes every 3min. Plus how do they say that its local when i'm in say Des Moines,Ia or may be in Columbus, Oh or even Columbia,Md and can hear the traffic and weather for chicago or minneapolis,mn some where in the country,You can't here local station from these points,So i say leave Them (xm) Alone and that the local station ought to take this and better there service and quit there crying fowl.....
